

micro:bit | Neopixels

Connect the micro:bit to MicroBlocks.

First, import the NeoPixel library.

Drag the *attach NeoPixel* block to the scripting area. Input the number of NeoPixels on your strip and the pin to which the strip is connected.

Drag the *set NeoPixels* block to the scripting area and click on it. Your NeoPixels should light up! Change the NeoPixels by selecting the green circles and customizing the colors.

To make it look like the rainbow is moving, rotate the NeoPixels by one forever when the program is started.
