CPX | Connect to the Circuit Playground Express
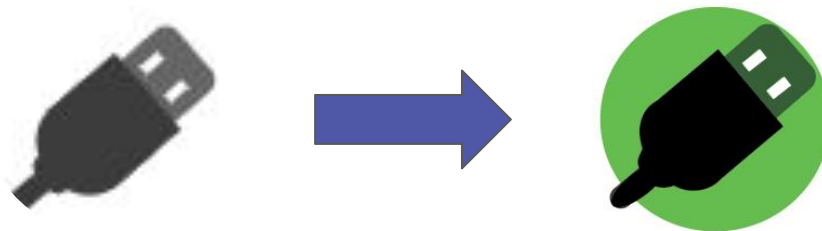

Visit microblocks.fun and download
MicroBlocks for free!

Note: On Macs, you will need to right click on the MicroBlocks app and select Open the first time.
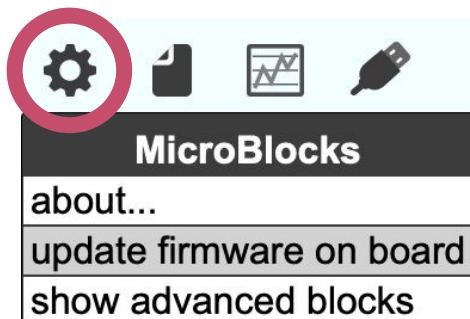

Connect the Circuit Playground Express to a computer with a USB cable
(note: make sure the USB cable is not a *power only* USB).

In the top bar of the MicroBlocks window, you will see a USB icon.
When you plug in your CPX, you should see the USB icon turn green.

In MicroBlocks, click the gear icon ⚙
to install the MicroBlocks firmware on
your Circuit Playground the first time.

Drag the *set NeoPixels* block
into the scripting area and click
it to see your CPX light up!
